Are you a Fortnite fan, but dont know your Epic account ID? Follow the guide to know how you can get to see your Epic Games account ID. We shall also see what does it help with and why one should learn it. Let us begin and explore the different methods of finding it. What is the Epic Games account ID? Your Epic Games account ID is primarily a unique serial number for your account that is unique to every gamer. Think of it like your accounts social security number, which is a long string of letters and numbers thats completely unique to you. Its different from your display name, which is what other players see. This ID is super important for Epic Games to identify your specific account, especially if you ever need to contact their support, deal with technical issues, or transfer game data. You can usually find it in your account settings on the Epic Games website or within some games themselves, the steps to unravel which we shall find later. Here are a few methods that can help you find your ID! Using the official website First, head over to the official Epic Games website and log in to your account. Once youre logged in, look for your display name in the top right corner of the page. The display name is your name that appears on the screen while you game. Click on that. A small dropdown menu will appear. Select Account from that list. Youll be taken to your account settings page. Your Epic Account ID will be right there, typically under a section like Account Info or General. Its a long string of letters and numbers that looks like it is jumbled or randomly put. That is what we are looking for! In Games This can help you if you are a regular gamer and want to retrieve the account ID while being inside the game. Let us take the example of Fortnite only, which is the most popular one. When you are inside the game of Fortnite, then from the lobby, click on your profile picture. Go into Settings and then navigate to the Account and Privacy tab right there. You should see an option to display your Epic Account ID there. Just hover over it, and it will become visible to you. Now you can see it and even note down somewhere if thats what you intended to do. Press the Windows Key + R to open the Run box. Type AppData and hit the Enter key. Navigate through Local > EpicGamesLauncher > Saved > Data to get to the final step. Youll see some files there, and your account ID is often part of the filename itself. While the third method may seem a bit intricate, the other two are super easy. But we leave it completely up to you and you are free to choose the way that works the best for you. All of them work just fine and you can have your pick. Tags: #howtoepic account IDEpic GamesFortniteonline games 2025 An Epic ID allows players to match up with friends in multiplayer games or view their detailed stats on third-party sites. However, locating your Epic ID isnt that straightforward if youve never done it before. If youre struggling to find your unique identification number, were here to help. This guide will explain where to find your Epic ID on the Epic Games website and in Rocket League. Additionally, well share instructions on linking your Rocket League account with your Epic ID and finding your Epic ID in Fortnite. In the end, well answer some of the most common questions related to using your Epic ID, like the difference between it and a username. Follow the steps below to find your Epic ID: Head to the Epic Games official website and click Sign In at the upper right corner of your screen. Enter your account credentials. Hover your cursor over your profile name and click Account. Youll see your Epic ID at the top of the page. If youre looking to match up with friends in Rocket League, they need to know your Epic ID. Funnily enough, it cant be found in the game instead, youll need to log in to your Epic Games account via browser. Thankfully, your username can be used instead of your Epic ID and quickly found in the menu. Follow the instructions below: Launch Rocket League. From the main menu, navigate to the Friends tab at the bottom right of your screen. Your Epic account name and Rocket League username will be displayed at the top of the Friends List. If you still need to know your Epic ID, you can find it via Epic Games Launcher. Follow the steps below: Open Epic Games Launcher. Click your account name at the bottom left corner of your screen. Select Manage Account from the left sidebar. A new browser window will open. Navigate to General from the left sidebar, then find the Account Info section. Your Epic ID will be displayed at the top of the section. Alternatively, you can check your Epic ID directly on the Epic Games website. Heres how to do that: Head to Epic Games website. Click Sign In, located at the top right. Enter your account credentials and click Sign In again. Click your profile name and select Account. Your Epic ID will be displayed in the upper right corner of the page. You can use someone elses Epic ID or Epic username to find their account and add them to your Friends List in Epic Games Launcher. Youll need to ask them for their account info directly. Heres how to invite someone to your Friends List: Open Epic Games Launcher. Navigate to the Friends section from the left sidebar. A pop-u window will appear. Click the human silhouette with a plus icon located in the middle of a pop-up window to add a friend. Enter your friends Epic ID or username into the search box and click Send. An invite will be sent to your friend. Your friend can find and accept your invite in the Requests tab of the Add a Friend menu. If youd like to find someone and add them to your friends list in Rocket League, follow the steps below: Launch Rocket League. From the main menu, navigate to the Friends tab. Select Add a friend by Epic ID. Enter your friends Epic ID into the dedicated field and select Search. When you see your friends username appear on the screen, select Add Friend next to it. Your friend will need to accept the request. How Do You Link Your Epic ID With Your Rocket League Account? If youd like the convenience of linking your Epic ID to your Rocket League account, follow the steps below: 1. Open Epic Games Launcher. 2. Click your account name at the bottom left corner. 3. Select Manage Account. Epic Games portal will open in a new browser window. 4. From the left sidebar, select Connections. 5. Navigate to the Accounts tab. 6. Youll see all platforms you can connect with your Epic ID to Google, Steam, Github, Twitch, Xbox, PlayStation, and Nintendo Switch. Click Connect under your console name or Steam if youre playing on a PC. 7. Follow the on-screen instructions to verify your identity and complete the linking process. How Do You Find Your Epic ID in Fortnite? You need to know your Epic ID to connect Fortnite to Player Rush. Heres how to find it: 1. Launch Fortnite. 2. Select the preferred game mode. 3. From the lobby, open the main menu at the top right corner. 4. Navigate to Settings. 5. Select the gear icon and navigate to the Account page. Your Epic ID will be displayed in the Account Info section. Whats the Difference Between My Epic ID and Username? An Epic ID is a unique number assigned to every user upon account creation. Unlike the username, your Epic ID cant be changed and isnt displayed to other users. Hopefully, this guide has helped you locate your Epic ID. Now, you can start tracking your advanced game stats or matchmaking with friends. Dont forget to connect your Epic ID to your Rocket League account to link your progress and ranks across all platforms. Whats your favorite Epic Games release? Share your top picks in the comments section below. As an avid Fortnite player and content creator, Ive had my share of panic attacks thinking Ive lost access to my precious Epic account when I couldnt recall the email ID I had signed up with. But fear not fellow gamers! Here I share foolproof tips to find your Epic email without losing progress or purchases tied to your account. Can You Retrieve your Email from just the Epic Account ID? Short answer Yes partially! Follow these quick steps: Login to the Epic Games Account Portal using your credentials. Ensure 2 factor authentication is enabled for security. Under Account Info, youll now see a *****@***.com style masked email based on the first & last characters plus domain name used during sign up. [Partial Epic Email Example] This should help jog your memory or try signing in with likely email domains. If not, dont lose hope. Read on for more recovery options. Forgot your Password? Let Epic Help! Weve all been there, frantically trying multiple permutations of a forgotten password. Epic makes resetting your credentials easy via 2 methods: 1. Password Reset Link Head to Epics Login Page and click Forgot Password. Enter your Epic Account ID (the 9 digit number below your Fortnite username). Check your registered email inbox for the reset link. Once you have access again, I strongly suggest enabling 2 Factor Authentication via an Authenticator app to add an extra security layer. Over 300 million Epic Games accounts make them a prime target for hackers. 2. Customer Support If you dont receive the reset email, its possible your registered address is outdated or invalid. Reach out to Epics helpful support team via the Contact Form or live chat. Based on recent user reports, initial response time is under 12 hours with resolution in 1-3 days for straightforward requests. Have your Account ID, display name, last login details handy when opening a ticket. Tightening Epic Account Security for Peace of Mind Gaming message boards are filled with horror stories of losing access to valuable items, skins and progress due to hacked or compromised Epic accounts, especially Fortnite with over 350 million registered players as of 2022. As per Epics data, weak passwords, reused credentials and lack of two factor authentication are top reasons behind this. Implementing good security hygiene is crucial. Here are my tips as a gamer: Enable Two Factor Authentication using an authenticator app or hardware security key. Avoid sign in via Google or Facebook. Use a unique ID & password for your Epic account. Use a password manager and choose a strong, unique credential for Epic & email account. Add backup verification methods like trusted phone numbers and email addresses. Review Account Connections frequently and revoke access for unfamiliar 3rd party apps. Following these best practices drastically reduces the risk of your account being compromised. Pair this with the steps above to recover access in unlikely scenarios and you are set! While no system is 100% infallible, Epic investigates fraud rigorously especially around unsanctioned purchases. However account progress or ownership disputes are harder to settle without clear proof. An ounce of precaution beats the anguish and time lost in battling account theft. Enjoy your gaming adventures safely! P.S: If you are playing as a minor, I strongly encourage parents to manage the Epic account security for their children. Gaming sparks joy but needs supervision. Download Article Download Article If your account is hacked or you're locked out, knowing your Account ID will aid Epic Games Customer Support in helping you faster. This wikiHow will show you how to find your Account ID so you can use it to prove you're the owner of the account when you contact Customer Support. 1 2 Navigate to the settings page. If you're using a web browser, the link above will take you to the settings page. If you're using a console or gaming platform, you'll most likely need to navigate through your Epic Games account menu to find Settings. If you're having trouble finding settings, you need to open one of your Epic games (e.g., Fortnite) select a game mode, select Options in the lobby, and then select the gear icon to open your settings. Select the silhouette icon to find your account ID. Advertisement 3 Locate your Account ID. You'll see this near the top of the screen if you're using a gaming platform, and under the header "Account Info" if you're using a browser. You'll need this identifier if you're ever locked out of your account or hacked and contact Epic Games customer support.
