Sample analytical test questions answers

Question : 1 Who is the father of PHP?

Answers: 1 Rasmus Lerdorf is known as the father of PHP.

Question : 2 What is the difference between \$name and \$NAME?

Answers: 2 \$name is variable where as \$NAME is reference variable. Like \$name=\$name and \$NAME=\$name then \$name value is same.

Question : 3 How can we submit a form without a submit button?

Answer : 3 (a) script submit() function is used for submit form without submit button on click call document.formname.submit().

Question : 4 In how many ways we can retrieve the data in the result set of MySQL using PHP?

Answer : 4 We can do it by 4 Ways
1. mysql_fetch_row 2. mysql_fetch_array 3. mysql_fetch_object
4. mysql_fetch_assoc

Question : 5 What is the difference between mysql_fetch_object and mysql_fetch_array?

Answers: 5 mysql_fetch_object() is similar to mysql_fetch_array(), with one difference - an object is returned, instead of an array. Indirectly, that means that you can only access the data by the field names, and not by their offsets (numbers are illegal property names). MySQL_fetch_object will collect first single matching record where mysql_fetch_array will collect all matching records from the table in an array.

Question : 6 What are the differences between GET and POST methods?

Answers: 6 There are some difference between GET and POST method
1. GET Method have some limit like only 2kb data able to send for Request but in POST method it is unlimited.
2. When we use GET method requested data show in url but Not in POST method, So POST method is good for send sensitive request.

Question : 7 How can we extract string "gmail.com" from a string "http://info@gmail.com" using regular expression of PHP?

Answers: 7 preg_match("/http://.*?/", \$url, \$matches);
echo \$matches[1];

Question : 8 How can we create a database using PHP and MySQL?

Answers: 8 We can create MySQL database with the use of mysql_create_db('Database Name');

Question : 9 What are the differences between require and include?

Answers: 9 Both include and require need to include a file but when included file not found, include send Warning where as require send Fatal Error & stop the execution of script.

Question : 10 Can we use include ("xyz.php") two times in a PHP page "index.php"?

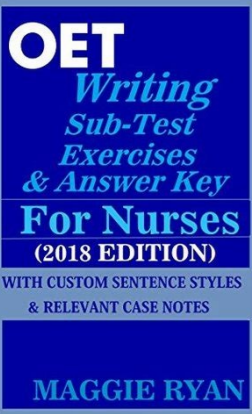

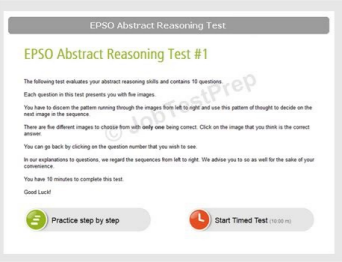

Answers: 10 Yes we can use include("xyz.php") more than one time in any
