The agile project management methodology ppt template contains eight sections that can be used to illustrate the different steps of agile project management. Page 8 JavaScript seems to be disabled in your browser. Page 14 JavaScript seems to be disabled in your browser. The users can simply deliver their knowledge using the flexible timeline PowerPoint template. The eight steps of agile project management are: sprint, sprint backing, product owner, product, release planning, sprint planning, sprint execution, and visibility and insight. Sprint is iteration but not all forms of iterations are sprints. The zigzag illustration of agile methodology is a spontaneous diagram, each section of the template are differently colored and having numbers and infographics icons for the easy learning of the audiences. There are several methodologies that can be used to manage an agile project, two of them are Scrum and Lean. The agile methodology starts work with a rough and random idea of what is required and by delivering something in a short period of time, clarifies the requirements as the project progresses.
