We empower diverse Care Organisations by providing a comprehensive platform for efficient service management, lasting relationships with quality agencies, and effective staff allocation. Our platform connects and manages agency partners, temporary agency staff, bank staff, rotas, electronic timesheets, and invoicing, ensuring seamless day-to-day operations. We select each agency carefully to match our clients' exact care criteria, with verified ratings guaranteeing high-quality services. To enhance efficiency, we provide analytical agency dashboards for managing spend, usage, and service levels. Our rigorous staff screening process ensures compliance with the highest CQC standards, including background checks, relevant training, and qualifications. We simplify rotas management by allowing you to post and fill positions in one click, reducing reliance on excel sheets and email correspondence. Our AI-powered platform connects you with verified agencies that meet your standards and budget, ensuring quality without compromise. While agencies focus on improving client service levels, we manage consistent demand for available workforce, supporting both small and large Care Homes. Our team, CareHires, offers dedicated temporary recruitment services, providing a reliable source of skilled staff. CareHires has been instrumental in our staffing needs since September 2020. The agency's staff are hardworking and reliable, and support is readily available for any issues or queries. I highly recommend CareHires for their commitment to supporting Care Providers with staffing emergencies.
