Walden's faculty includes scholar-practitioners and subject matter experts who are dedicated to helping you develop as a counseling professional. Explore other online counseling-related degree programs at Walden. Chat with a MS in Clinical Mental Health Counseling Enrollment Specialist. Chat Now The Master of Science (MS) in Counseling degree prepares individuals to be leaders and advocates in the fields of clinical mental health and school counseling. The program follows a nationally recognized, evidence-based curriculum aligned with national and state standards. The program is led by distinguished faculty and boasts a strong support network of school districts and mental health settings. The program's content includes: professional orientation and ethical practice, social and cultural diversity, human growth and development, career development, helping relationships, group work, assessment, and research/program evaluation. Students learn through didactic experiences, small group projects, and applied learning at community- or school-based sites. The Master of Science in Counseling degree program, with concentrations in Clinical Mental Health Counseling and School Counseling, is accredited by the Council for Accreditation of Counseling & Related Educational Programs (CACREP), a specialized accrediting body recognized by the Council for Higher Education Accreditation (CHEA). Students specialize in one of two concentrations: Clinical Mental Health Counseling School Counseling Students have a maximum of five years to complete the program, but are strongly encouraged to follow the prescribed program of study. Clinical Mental Health Counseling The concentration in Clinical Mental Health Counseling prepares students to work in a wide range of clinical, community, and human service settings. Upon graduation, candidates gain the knowledge, skills, and academic requirements necessary to begin the licensure process in Maryland and many other states. The Clinical Mental Health Counseling program is accredited by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP). Although the School of Education permits five years for program completion, there are full-time and part-time Clinical Mental Health Counseling sequences. Completion of a 100-hour practicum and 600-hour internship are required in this program. The Clinical Mental Health Counseling program is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). School Counseling The School Counseling concentration prepares students to work in K-12 schools with an emphasis in urban school settings. The program is approved by the Maryland State Department of Education (MSDE), and graduates are eligible for MSDE certification as school counselors. Students have a maximum of five years to complete the program but are strongly encouraged to follow the prescribed program of study. The School Counseling concentration is also accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). Completion of a 100-hour practicum and 600-hour internship are required in this program. Applicants to the program must hold a bachelor's degree from an accredited college or university and have earned a minimum cumulative grade point average of 3.0 (on a 4.0 scale) in all previous undergraduate and graduate studies (including incomplete programs of study and for programs still in progress). Applicants must submit an application, official transcripts from all accredited post-secondary institutions attended, a résumé or curriculum vitae, a personal statement of goals, and two letters of recommendation. Qualified applicants will be invited to participate in a group admission interview. The program's plan of study requires 60 graduate credits to be completed through full-time or part-time matriculation and students must successfully pass the Counselor Preparation Comprehensive Examination (CPCE) prior to or during the last semester of their graduate program. With the approval of the program advisor, a student may transfer a maximum of six graduate credits from an accredited college or university if the course directly aligns to the student's degree requirements and is taken within the five-year time limit. Completion of a 100-hour practicum and 600-hour internship are required in this program. In addition to required courses, Clinical Mental Health students also enroll in two elective offerings. Electives include ED.863.626 Behavioral Medicine and Health Psychology Applications in Clinical Mental Health Counseling, ED.861.713 Advanced Treatment Approaches, and ED.863.674 Meditation and Mindfulness. Required Courses The mission of the Johns Hopkins School of Education Counseling Program is to prepare graduate students to serve as socially just school counselors and clinical mental health counselors who implement theoretical, empirical, and practical frameworks that facilitate client growth and development, introspective awareness, and well-being in a global society. Programmatic Goals Facilitate students' mastery of requisite knowledge, skills, and dispositions aligned with CACREP Standards to deliver counseling services that embody social justice principles, advocacy, multiculturalism, and upholds the worth and human dignity of all clients from culturally diverse backgrounds. Support and encourage students to incorporate a developmental approach to promote client wellness across the life span. Facilitate students' development of dispositions to serve as social justice advocates and leaders in the profession. Cultivate a collaborative learning atmosphere that incorporates cutting edge research and excellent didactic and experiential instruction. Program Objectives PO1 Graduates will demonstrate the skills and competencies to incorporate a developmental approach to promote student/client holistic well-being across the life span, inclusive of mental health, academic, social/emotional, cultural, and career goals. (CACREP F.3 Human Growth & Development, F.4 Career Development) PO2 Graduates will demonstrate the skills and competencies to serve as advocates and leaders in educational and/or mental health settings that value social justice principles, multiculturalism, human dignity and the worth of all clients from culturally diverse backgrounds (CACREP F.2 Social & Cultural Diversity, 5.G. School Counseling) PO3 Graduates will demonstrate the skills and competencies to assess needs, develop goals, and counsel students/clients in educational and/or mental health settings from culturally diverse backgrounds. (CACREP F.5 Counseling & Helping Relationships, F.7 Assessment & Testing) PO4 Graduates will demonstrate the skills and competencies that reflect the knowledge, roles, and functions of the school and/or mental health counselor. (CACREP 5.C. Clinical Mental Health Counseling; 5.G. School Counseling) PO5 Graduates will demonstrate the skills and competencies to effectively facilitate group work with students/clients from diverse backgrounds in educational and mental health settings (CACREP F.6 Group Counseling & Group Work) PO6 Graduates will demonstrate the skills and competencies to develop equitable data-driven school counseling programs that meet the unique needs of student populations in educational settings. (CACREP F.8 Research & Program Evaluation; 5.G. School Counseling) PO7 Graduates will demonstrate the skills and competencies to develop, apply, and evaluate evidence-based practices that meet the developmental needs of students/clients from diverse backgrounds in educational and mental health settings. (CACREP F.8 Research and Program Evaluation; 5.G. School Counseling; 5.C. Clinical Mental Health Counseling) PO8 Graduates will demonstrate the skills and competencies to work ethically, legally, and professionally in educational and/or mental health settings (CACREP F.1. Professional Counseling Orientation & Ethical Practice) Online Master's Degree Program Promote the Mental Health and Wellness of ClientsGain the knowledge and skills you need to provide support to people with the online master's in clinical mental health counseling. The UWA Mentor Collective program enhances your online learning experience by linking you one-on-one with a mentor. Students learn what to expect in school, while mentors build their networks and develop skills to become better professionals and leaders. Submit your information to be contacted by phone/email. London, Bloomsbury The UCL Division of Psychiatry is pleased to offer this programme focused on clinical practice in mental health and its evidence base. The Clinical Mental Health Sciences MSc integrates biological, psychological and social perspectives on mental health and caters both for psychology graduates and for clinicians wishing to undertake a broad-based, rigorous and flexible higher degree. UK students International students An upper second-class Bachelor's degree in psychology or a related scientific or social science discipline, or a professional health qualification (medicine, nursing, occupational therapy, psychology, social work) or an overseas qualification of an equivalent standard.Candidates who do not have at least six months' full-time work experience (or the equivalent) in a mental health service setting or in clinical mental health research are required to take the Clinical Mental Health double module. English language requirements The English language level for this programme is: Level 2 UCL Pre-Master's and Pre-sessional English courses are for international students who are aiming to study for a postgraduate degree at UCL. The courses will develop your academic English and academic skills required to succeed at postgraduate level. Further information can be found on our English language requirements page. Equivalent qualifications Country-specific information, including details of when UCL representatives are visiting your part of the world, can be obtained from the International Students website. International applicants can find out the equivalent qualification for their country by selecting from the list below. Please note that the equivalency will correspond to the degree classification stated on this page (e.g. upper second-class). Where a specific overall percentage is required in the UK qualification, the international equivalency will be higher than that stated below. Please contact Graduate Admissions should you require further advice. Students will develop an in-depth understanding of current evidence regarding mental health problems and the interventions provided to address them, as well as enhancing their research skills. A wide range of options from across the School of Life and Medical Sciences at UCL allows students to tailor a programme that fully fits their needs.All students undertake a final research project, to be reported as a paper of up to 7,000 words ready for submission to a specified journal, a blog of 1,000 words and a 20-minute talk. For more information, please visit: The programme is designed both for graduates in psychology and other related subjects who wish to develop their clinically relevant knowledge and skills in the area of mental health, and for mental health practitioners, including trainees, who wish to enhance their advanced knowledge and skills. UCL has a cluster of international experts in mental health, including in genetics, epidemiology, and applied clinical research, and most are also clinicians. We are able to offer a broad programme encompassing both cutting-edge research and a clinical perspective.The programme is strongly focused on student participation, with much use of small-group learning, and the environment in the Division of Psychiatry is stimulating, friendly and supportive.A wide range of options at UCL allows programmes to be tailored to students' needs and interests in clinical, research and management domains. This programme can equip you with the skills to follow varied career paths including as psychologists, and research assistants and we expect many of our graduates to go onto further study. Employability For non-clinicians, the programme will be an excellent grounding for clinical training, such as in clinical psychology, or for embarking on a research career in mental health. Many graduates go on to research assistant, clinical support worker or assistant psychologist posts as a first destination. The programme is also intended to prepare students for PhD studies, also a major onward route. For clinicians, this is a great opportunity to gain a higher qualification through a programme based in a leading university department which can be closely tailored to your interests across clinical, research and management fields. You will work with other students and tutors drawn from across the Faculty and University. Also, there is an alumni network for the Division of Psychiatry MSc graduates. The programme is delivered through lectures, seminars and workshops, with considerable use of supporting online learning. Assessment methods include unseen examinations, coursework including designing questionnaires and protocols and analysing data, giving talks and presenting posters, and a final report in the format of a journal paper or brief for clinicians or service partners. For full-time students, typical contact hours are around 12 hours per week. Outside of lectures, seminars, workshops and tutorials, full-time students typically study the equivalent of a full-time job, using their remaining time for self-directed study and completing coursework assignments. Full-time students should choose 180 credits to make up their MSc. The compulsory modules are:PSBS0002 Core Principles of Mental Health Research (30 credits)PSBS0001 Clinical Mental Health(30 credits) *only compulsory for students that do not have at least six months' full-time experience, or the equivalent, of working in mental health settingsPSBS0015 Final Project (Research Project) (60 credits)Remaining credits can be obtained from optional modules. Students who take the Clinical Mental Health module will take four optional modules, including at least one from the Division of Psychiatry. Students who do not take this module will take six optional modules, including at least three from the Division of Psychiatry. Part-time students should choose 90 credits in their first year and 90 credits in their second year (180 credits in two years).The compulsory modules are:PSBS0002 Core Principles of Mental Health Research (30 credits) - to be selected in the first yearPSBS0001 Clinical Mental Health (30 credits) *only compulsory for students that do not have at least six months' full-time experience, or the equivalent, of working in mental health settingsPSBS0015 Final Project (Research Project) (60 credits) - to be selected in the second yearRemaining credits can be obtained from optional modules. Students who take the Clinical Mental Health module will take four optional modules, including at least one from the Division of Psychiatry. Students who do not take this module will take six optional modules, including at least three from the Division of Psychiatry. Modular Flexible students can take between one to five years to complete their MSc which is made up of 180 credits. The main core modules must be taken at the beginning of the course as they form the basis of the course.The compulsory modules are:PSBS0002 Core Principles of Mental Health Research - 30 credits compulsory to all.PSBS0001 Clinical Mental Health (30 credits) *only compulsory for students that do not have at least six months' full-time experience, or the equivalent, of working in mental health settingsIn the last year, students must take their final project.PSBS0015 Final Project (Research Project) - 60 CreditsDuring the five years students can choose from optional and elective modules to make up the 180 credits required for the MSc.Remaining credits can be obtained from optional modules. Students who take the Clinical Mental Health module will take four optional modules, including at least one from the Division of Psychiatry. Students who do not take this module will take six optional modules, including at least three from the Division of Psychiatry. Core Principles of Mental Health Research Final Project (Research Project) Please note that the list of modules given here is indicative. This information is published a long time in advance of enrolment and module content and availability are subject to change. Modules that are in use for the current academic year are linked for further information. Where no link is present, further information is not yet available. Students undertake modules to the value of 180 credits. Upon successful completion of 180 credits, you will be awarded an MSc in Clinical Mental Health Sciences. We do not have formal assessed placements as part of the course, but many students spend a day a week volunteering in NHS or clinical research settings for all or part of the course, and we are happy to help people find suitable settings in which to undertake this voluntary experience. Online - Open day Graduate Open Events: Introduction to the Division of Psychiatry and the Mental Health Sciences MSc The UCL Division of Psychiatry is a world-leading interdisciplinary centre for research and teaching into mental health and illness. During the session you'll get to hear from the programme Directorship and current students about the Division of Psychiatry and our suite of Masters programmes. We will also be doing a special feature on the Mental Health Sciences MSc. We'll discuss the course structure, modules, career outcomes and life as a student in the department, UCL and London more widely. UK students International students Fee description Full-time Part-time Tuition fees (2025/26) £16,000 £8,000 Tuition fees (2025/26) £39,800 £19,900 Programme also available on a modular (flexible) basis. The tuition fees shown are for the year indicated above. Fees for subsequent years may increase or otherwise vary. Where the programme is offered on a flexible/modular basis, fees are charged pro-rata to the appropriate full-time Master's fee taken in an academic session. Further information on fee status, fee increases and the fee schedule can be viewed on the UCL Students website: ucl.ac.uk/students/fees. Additional costs For Full-time and Part-time offer holders a fee deposit will be charged at 10% of the first year fee. For flexible/modular offer holders a £500 fee deposit will be charged. Further information can be found in the Tuition fee deposits section on this page: Tuition fees. The programme team support students in obtaining volunteer placements in relevant mental health care and research settings, but this is not a formal part of the programme and is entirely optional. Small costs may be associated with these placements, especially for travel around London, and need to be met by the student. UCL's main teaching locations are in zones 1 (Bloomsbury) and zones 2/3 (UCL East). The cost of a monthly 18+ Oyster travel card for zones 1-2 is £114.50. This price was published by TFL in 2024. For more information on additional costs for prospective students and the cost of living in London, please view our estimated cost of essential expenditure at UCL's cost of living guide. Funding your studies Students are advised to apply as early as possible due to competition for places. Those applying for scholarship funding (particularly overseas applicants) should take note of application deadlines. There is an application processing fee for this programme of £90 for online applications. Further information can be found at Application fees. When we assess your application we would like to learn:Why you want to study Clinical Mental Health Sciences at graduate levelWhy you want to study Clinical Mental Health Sciences at UCLWhat particularly attracts you to this programme.How your personal, academic and professional background meets the demands of this challenging programme.Where you would like to go professionally with your degree.Together with essential academic requirements, the personal statement is your opportunity to illustrate whether your reasons for applying to this programme match what the programme will deliver. Please note that you may submit applications for a maximum of two graduate programmes (or one application for the Law LLM) in any application cycle. Please read the Application Guidance before proceeding with your application. UCL is regulated by the Office for Students. Register interest in your chosen subject to receive notice of graduate open days, events and more.
