Format of writing a letter to friend

Correct Answer: Correct Answer: Photo Courtesy: Alain Jocard/Getty Images When looking for a new physician, some people just search 'doctor near me' and hope for the best. However, just because a doctor is close doesn't mean they're the best fit for you, or even a good one. Rather than taking a chance on a stranger with your family's health, try asking these questions before making your choice. It may seem obvious, but checking with your insurance company first to make sure a doctor's services will be covered should be the first thing you do before visiting any doctor. If they do not accept your insurance, you'll be paying out of pocket or filing for out of network coverage, both of which are expensive which is expensive. While it can be a hassle to have to call, it will be an even bigger pain to have to deal with huge medical bills. Photo Courtesy: Bloomberg/Getty Images Don't let your insurance company off the line quite yet! Depending on what insurance plan you have, there may be a copay for certain types of visits. For instance, office visits may have a copay, while physicals might not. Depending on your insurance plan and anticipated medical needs, it might make sense to choose one doctor over another based on copay policies. Photo Courtesy: Jeff Greenberg/Getty Images Many primary care providers offer in-office services, including wart and skin tag removal, cryotherapy, trigger point injections, botox, X-rays, EKGs and more. If you have a history of dermatological problems, are interested in plastic surgery, or expect to need any other medical services in the future, you could save yourself time and money by choosing a general practitioner whose office can cover your needs without forcing you to see someone else. Photo Courtesy: Getty Images Once you're done speaking with your insurance provider, it's time to deal with the doctor's office. Healthcare is always in high demand, and that means you also need to check the availability of your desired doctor. If they accept many kinds of insurance or have a particularly good reputation, they might already have too many patients to take on more, leaving you out of luck. Photo Courtesy: Jeff Greenberg/Getty Images Different doctors have different workloads, and some office staff are just better at processing documents and patients in a timely manner. A doctor might not be able to answer this question directly, but by looking at online review sites, such as Healthgrades or Vitals, you can get an idea of how long people have to wait to see a given doctor, not to mention other thoughts fellow patients might have. Just be sure to take the reviews with a grain of salt — after all, not all bad reviews are necessarily reasonable. Photo Courtesy: BSIP/Getty Images If you have a primary care provider that allows existing patients to walk in and receive instant care, you know that when you suddenly get sick, you can rely on them to take care of you. This is a great option for kids, as scheduling an appointment around school days can be a hassle. Just be aware that the added convenience might also come with longer wait times. Photo Courtesy: Education Images/Getty Images If you have a chronic medical condition and are looking for a new doctor, consider making familiarity with that condition one of your key criteria. While most general practitioners have at least some familiarity with most conditions, choosing someone who specializes in care in that area can ensure you receive better treatment and don't end up repeating tests and procedures that you know haven't helped in the past. You can usually find this information on a doctor's website. Photo Courtesy: Joe Raelle/Getty Images There are advantages and disadvantages to having a family doctor who works at a big hospital. While you might receive more personalized care and even build up a personal relationship with a physician at a smaller hospital, a larger healthcare facility is likely to provide more services and have plenty of choices available if something comes up and your regular doctor can't see you. Photo Courtesy: Noam Galai/Getty Images If a physician has a hospital affiliation, that means that even if they're part of a small practice, they also also have an extensive network to fall back on and can refer you to the right people in the event that you need a specialist. If they're all part of the same hospital network, there's also a good chance that whoever they recommend will also be covered by your insurance, although you should always double check. Photo Courtesy: Construction Photography/Avalon/Getty Images If you are on a psychotic medication or any other controlled substance, there might be additional barriers for some doctors as they may not prescribe controlled substances under certain conditions. Call and ask if they would be willing to work with you on managing these medications and see if they can even help you find a dose that works. Rocketclips, Inc./Shutterstock JHM CareLink is a web-based application for connecting JHM member organizations to community practices. Through JHM CareLink, community users can gain secure access to select patient information in the JHM EMR data repository and improve the continuity of care. This continuity provides many benefits for our patients, including the following: Provides a more transparent flow of information between physicians. Makes it easier for external physicians to place referrals and orders to JHM. Connects clinicians at JHM with specialists using e-visits, providing care to a broader group of patients. Lets JHM send releases of information electronically to community clinics. Gives your community clinics access to review the patient's chart for coding and following up on claims. Allows for coordination of social services outside of JHM. JHM CareLink is not an EMR solution; it is a mostly read-only application with a few service-oriented features, such as procedure order entry and co-signing home health orders. JHM CareLink provides referring physicians with access to their patients' medical records for 90 days following a physician consultation, labs or imaging tests, outpatient visits or hospitalization at The Johns Hopkins Hospital, Johns Hopkins Bayview Medical Center, Howard County General Hospital, Sibley Memorial Hospital, Johns Hopkins All Children's Hospital and Johns Hopkins physicians' outpatient services. You can also order a specialty consultation to be scheduled by the patient. Community users outside of JHM who need to review the clinical and administrative information of patients seen within Johns Hopkins Medicine member organizations. Community users could include the following: Referring physicians Referred-to physicians Contracted physicians Community physicians and their support staff Legal offices or agencies requesting documentation through HIM Community-based and public health organizations There is no cost associated with using JHM CareLink. Access to the internet using a commercial browser such as Chrome (recommended) or Safari. The use of Internet Explorer is discouraged. You can request JHM CareLink access for clinical staff, nonclinical staff and office administrators in your practice. Each staff member will need to enroll in Johns Hopkins CareLink, electronically sign the terms and conditions, and abide by rules of patient confidentiality. You and your clinical staff, including physician assistants, nurses, administrative personnel and office manager, will have access to your patients' medical records. At least one person at your site must be designated as the site administrator, who will have additional administrative responsibilities. Self-service password reset (available 24 hours)Can my site administrator reset my password?Yes, your site administrator can reset your password.I forgot my password and/or my challenge questions.Please call the Help Desk, available 24/7 at 855-284-5465, and ask to open a CareLink ticket for password resets. Please allow up to 48 hours for processing your request. We highly encourage you to set up the challenge questions so you can reset your password automatically via self-service. Since you already have access to the full version of Epic when you are in the hospital, please use the In Basket provided on that version. Contact your local technical support. The printing functionality is not controlled by CareLink. You need to check if your local computer has the correct drivers and setup for your network or local printer. The physician needs to grant In Basket access to the nurse first. Once this is done, the nurse can attach to the desired In Basket. Please ask the research coordinator to add the patient to the group. Please refer to page 20 of the following guide. Please refer to this tip sheet. If you cannot find the patient, please contact registration at 410-955-5000 to verify the full demographic information of the patient. Please contact your site administrator, who is your first point of contact for any questions/problems. If the site administrator is not able to assist you, please call the Help Desk, available 24/7 at 855-284-5465, and ask for help with CareLink. Please contact the JHM CareLink team at hopkinscarelink@jhmi.edu. This is not for urgent issues, and the CareLink team will respond within 48 hours.
