My 10 year old son wanted me to get this game so we could play both. I was pleasantly surprised by how well designed the interface is. The overall look is just clean and nice. The emoji are super cute! Also, I love the love that the ads are more or less optional. In other games that are freeÁ é Á é, you have to slog through ads only to continue playing. In this game, the ads are for when you want something extra, and only if you want. You donÁ t have to watch an ad to continue playing, but you could watch one of you wants a free ride from the most prize wheel, for example. EA é sa breath of fresh air, and it makes me want to play even more actually purchase the app in jewel boxes etc. The only thing I dislike is that every time my daughter wants to buy a jewelry box, she doesnÁ é t get her shopping. IA already reported this to Apple, and they refunded my two latest acquisitions has failed. Now, I tried again and the same thing happened. So now I'm going through the developer to see if they can address the issue with a request for assistance. Overall, though, this is a good game for the little ones (and I suppose that even adults!) If you like this kind of puzzle games. I thought that because © is associated with Disney it would be a better overall quality and I was not wrong. Now letÁ s hope I can get the gems I promised my son will go to CMU! Your 5-star is very welcome! We are happy to know that you are having a great time with our game, and we hope that the game can continue to be a source of joy and fun for you!
