The default functionality of the Android notes, however, only allows you to recover (read: Paste) the recent voice, I.E., The last text you copied. What happens at the e-mail address you copied 30 minutes before copying another text? Do you have to restore it? No. Not if you are able to check and retrieve content from your device's clipboard. In this post, we go beyond two (2) common but efficient ways to control the clipboard history on an Android smartphone. When you have finished reading this, you would have learned how to easily retrieve any previously copied text without ever having to worry about losing them. Oh, by the way, you would soon be able to copy the images (not just text) to your Android clipboard soon. Exciting times, no? One of the simplest ways to view and retrieve clipboard history on an Android device is using the keyboard. Interesting to note that many keyboard apps now have a clipboard manager that can be used to access previously copied texts. We have listed some of the best Android keyboards with clipboard history support, but in this article we will show you how to recover the clipboard history using Gardboard, the official Google App.GBoard keyboard is the most used Android keyboard app on Google Play Store. It is very reliable and easy to use use All that can be attributed to the fact that it is pre-installed on most Android devices. The Clipboard Manager function has been integrated into the Gboard Garden app about two years ago, and here is how it is possible to use it to verify and retrieve clipboard history on your Android.Sep 1 smartphone: while typing with GBOARD, Touch L 'Clipboard icon next to the Google logo. Starting the manager manager manager.sep 2: To retrieve a particular text / clip from the clipboard, just tap on it in paste in the text box. Warning: By default, clips / texts in the Gardboard notes are deleted after an hour. If you want a copy copied to stay in the Gardboard clipboard forever, you will need to check it manually. To do what, just tap and hold the clip and select the PIN icon. The clip will now be moved to the pinned section of the clipboard manager. To get the best from the Gardboard Clipboard Manager, you want to make sure that the function is always enabled and active. If you start the clipboards managers and says that 'Gardboard notes is turned off,' simply deactivate it using the switch. If the clipboard manager is disabled, GBOARD does not back up the copied texts. And then, there would be no way to recover them. If you can't find or use the Clipboard Manager feature on the phone card, make sure the app is updated. You can visit Google PlayStore on your device to update it or use the link below for quick access.Update Gardboard on PlayStoreif Gboard (or its clipboard manager) still does not work in the way you should check some troubleshooting options in this article to solve it. 2. Using dedicated notes apps other efficient way to verify and retrieve the contents of the clipboard on your Android device is to use the third-party clipboard apps. Some of these apps also offer advanced and fastest functionalities and gluing GBoard's functionality. If you are a serial texter or you often have to copy and paste a lot of content on your smartphone, you will find that some of these clipboard apps are even more interesting.
