Google Play Games Beta on PC allows users to play mobile games on their Windows computer, offering better graphics and the ability to use a keyboard and mouse. Progress can be synced across devices, and users can earn Play Points regardless of which device they play on. To use Google Play Games on PC, users must meet certain system requirements, including a solid-state drive with 10 GB of available storage space, 8 GB of RAM, and an Intel UHD Graphics 630 GPU or comparable gaming-class GPU. You need to store data only as long as necessary for a credit card transaction. This helps ensure the security of your personal information. You might see an authorization on your account when you use your credit card to verify your date of birth, but this is just to check that everything is in order with your card and account. The small amount won't be billed, and the authorization will disappear soon.###ARTICLETo remove Google Earth Pro from your computer or install it on PC, follow these steps. First, uninstall the program by finding and selecting it in your Applications folder. Then, right-click the icon and choose "Move to Trash". If you want to delete all files related to Google Earth Pro, go to Finder, search for Library, and then find Caches and Application Support folders. Delete any files you find there.###ARTICLEto acces youre google account, go to googl com account. tap persnal info, den tap kontakc info. onlee den can u see teh recovere phone seciton, tap add recovery phon. recovery info helps with: find out if sumone els uss youre account. tak bak youre akount if sumone els noz youre paswrd. get in to youre akount if u forhet ur paswrd or cant sign in ennymore add recovere phon###ARTICLE
