Below is a massive list of magic words - that is, words related to magic. The top 4 are: magical, enchantment, fantasy and spell. You can get the definition(s) of a word in the list below by tapping the question-mark icon next to it. The words at the top of the list are the ones most associated with magic, and as you go down the relatedness becomes more slight. By default, the words are sorted by relevance/relatedness, but you can get the most common magic terms by using the menu below, and there's also the option to sort the words alphabetically so you can get magic words starting with a particular letter. You can also filter the word list so it only shows words that are also related to another word of your choosing. So for example, you could enter "magical" and click "filter", and it'd give you words that are related to magic and magical. You can highlight the terms by the frequency with which they occur in the written English language using the menu below. The frequency data is extracted from the English Wikipedia corpus, and updated regularly. If you just care about the words' direct semantic similarity to magic, then there's probably no need for this. There are already a bunch of websites on the net that help you find synonyms for various words, but only a handful that help you find related, or even loosely associated words. So although you might see some synonyms of magic in the list below, many of the words below will have other relationships with magic - you could see a word with the exact opposite meaning in the word list, for example. So it's the sort of list that would be useful for helping you build a magic vocabulary list, or just a general magic word list for whatever purpose, but it's not necessarily going to be useful if you're looking for words that mean the same thing as magic (though it still might be handy for that). If you're looking for names related to magic (e.g. business names, or pet names), this page might help you come up with ideas. The results below obviously aren't all going to be applicable for the actual name of your pet/blog/startup/etc., but hopefully they get your mind working and help you see the links between various concepts. If your pet/blog/etc. has something to do with magic, then it's obviously a good idea to use concepts or words to do with magic. If you don't find what you're looking for in the list below, or if there's some sort of bug and it's not displaying magic related words, please send me feedback using this page. Thanks for using the site - I hope it is useful to you! sort by: relevancealphabeticalcommonness also related to: highlight: no highlightcommonness That's about all the magic related words we've got! I hope this list of magic terms was useful to you in some way or another. The words down here at the bottom of the list will be in some way associated with magic, but perhaps tenuously (if you've're currently got it sorted by relevance, that is). If you have any feedback for the site, please share it here, but please note this is only a hobby project, so I may not be able to make regular updates to the site. Have a nice day!
